Deliverable 6.4 RiCORE Targeted Communications

This deliverable contains the information on which targeting of project communications has been based. The four worksheets identify the key stakeholder groups that have been involved with aspects of the project. Within each worksheet are columns for each project partner country, and one for other countries, which list the names and organisations of stakeholders to be contacted. Although the project has a record of contact details (primarily email addresses) for Data Protection reasons these are not shown in this deliverable.

This project has received funding from the European Union's Horizon 2020 research and innovation programme under grant agreement No 646436.
